Fourth Generation Piano Instrument

MODARTT  
TRUE MODEL COUPLING

Press release  
March 24, 2010

## Modartt releases 'K1' grand piano for Pianoteq

*Modartt expands its collection of high class pianos in the latest update of Pianoteq by the addition of 'K1' grand piano. Its natural clarity and elegance make the K1 a splendid piano inviting you to immediate improvisation, and the exquisite subtlety of its tonal shading works beautifully in audio recording.*

### An amazing musical instrument

The K1 grand piano is the latest piano creation of Modartt virtual piano factory. This new instrument combines stunning dynamics, sharp attacks and powerful fortissimos with a very nice woody percussive quality. The result is an amazing musical instrument that invites you to improvise straight away. Its many qualities make it suitable to all styles of music and work beautifully in recording. A new tone colour and a fresh sound: you will enjoy playing it!

**K1 joins the current C3 and M3 pianos embedded in Pianoteq.**

#### **Commercial add-ons available:**

- Rock piano YC5
- Electric pianos Rhody and Wurly
- Clavinet CL1
- Vibraphones V-M and V-B

**The free add-on KIViR offers a unique collection of historical instruments: cimbalom, harpsichords, pianoforte, early pianos, CP80 electric piano.**

### Based on the Pianoteq engine

The K1 grand piano is based on the award-winning Pianoteq physical model. In contrast to other virtual pianos, Pianoteq models all 127 MIDI velocities, providing a thrilling playing experience by real progressive variation of the timbre. Pianoteq also allows unique modification of physical properties, such as unison width, hammer hardness, string length and soundboard. On top of this, the tone colour and ambience can be controlled by Pianoteq's advanced sound output setting where it is possible to place up to 5 virtual microphones at any position around the instrument. For the most demanding users, the Pianoteq Pro version allows parameter adjustments on a note-per-note basis.

### Listen & Download

The K1 grand piano is free to all Pianoteq customers by being included in the latest version 3.6. It is also included in the latest trial version (free download). Further details with audio demos are available on the website [www.pianoteq.com](http://www.pianoteq.com).
